

B. Read the paragraph below and then mark the data in a line graph showing the results of the businessman from 2000 to 2010.

Tim Burton's business is delivering pizzas in a small town. He made good profits of €4,000 in 2000. Through buying new equipment and improvements in the economy, profits rocketed in 2002 to €5,500. His pizzas delivery business continued strongly and profits for 2004 climbed to €6,000. In 2006, Tim suffered serious problems and profits slumped to €4,500. In 2007 the business declined a little further to € 4,200 but remained relatively stable in 2010 by gradually climbing to €5,000.

C. Read the following arithmetic operations

$$1 + 2.5 = 3.5$$

$$10 - 4.5 = 5.5$$

$$20,000 \div 1,000 = 20$$

$$2.5 \times 4 = 10$$
